

How to Make Money Online as a Complete Beginner

Welcome! If you've never made money online before, this guide is for you. Follow each step carefully.

Step 1: Understand the Basics

- Making money online means you earn income using the internet—no special skills needed to start.
- You can promote products, offer services, or share referral links.

Step 2: Set Up Your Payment (Stripe)

- Make sure your Stripe account is upgraded and connected (see Guide 1 above).
- This is how you'll get paid.

Step 3: Get Your Affiliate Link

- Log in to your back office.
- Find your unique referral or affiliate link. This is the link you'll share to earn commissions.

Step 4: Share Your Link

Where to share: - Social media (Facebook, Instagram, TikTok, Twitter) - Messaging apps (WhatsApp, Messenger, Telegram) - Email (send to friends/family) - Your own website or blog (if you have one)

How to share: - Write a short message about the product or service. - Example: "Check out this amazing AI tool! Sign up here: [your link]"

Tips: - Be honest and friendly. - Don't spam—share with people who might be interested.

Step 5: Learn and Improve

- Read the other guides (Facebook, TikTok, Instagram, etc.).
- Try different messages and platforms to see what works best.

Step 6: Get Paid

- When someone uses your link and makes a purchase, you earn a commission.
- Stripe will send your earnings to your bank account automatically.

Remember: - Everyone starts as a beginner. - Be patient and consistent—results come with time and effort. - Ask for help in your back office if you get stuck!
